The Frontend Developer Career
Path

Brandon Guthrie

Full-Stack Software Engineer | Full-Stack & Frontend Focus |
React, .NET, Redux, MUI | Independent, Self-Driven, Passionate
About Code

Garvin, Oklahoma, United States

Summary

I'm a software engineer with 4 years of professional experience building full-stack web applications — primarily using React, .NET, Redux, and Material UI. I've been working remotely for a healthcare provider, where I've contributed to complex features end-to-end, from backend APIs to polished frontend interfaces.

I'm passionate about creating clean, scalable, and user-centered solutions. Whether I'm mocking up a UI from scratch or diving into backend logic, I love solving problems through thoughtful design and clean code. I take pride in being self-directed, highly reliable, and comfortable owning features with minimal oversight.

Outside of work, software development is more than just a career for me — it's a craft I genuinely enjoy. I constantly explore new tools, patterns, and best practices to sharpen my skills and stay current in a fast-moving field.

I'm currently looking for opportunities in frontend or full-stack development with companies that value growth, mentorship, and long-term collaboration. If you're looking for someone who's not just technically capable, but also deeply invested in continuous improvement — let's connect.

Experience

Catalytic Health Partners

Software Developer

August 2022 - Present (3 years 2 months)

Oklahoma, United States

Lead the conversion of a large-scale healthcare provider application from Angular to React

Designed and implemented patient care plan interfaces, built onboarding APIs, Healthcare Information Exchange platform for sending and receiving health information in HL7 format, created intuitive UI components for clinical workflows, and many other features.

Coordinated and planned remotely with co-workers via Microsoft Teams and Jira.

Tech stack:

React/TypeScript with MUI for the frontend

C# with .NET for the backend

MongoDB database

Tlancer

Full-stack Developer

April 2022 - August 2022 (5 months)

Converted Figma design files into web application using ReactJS and Bootstrap frontend libraries. Implemented responsive design and W3C valid code. Assisted in building backend with NodeJS, Express, and MongoDB.

Self-employed

Frontend Web Developer

April 2021 - August 2022 (1 year 5 months)

Hello LinkedIn! My name is Brandon, a Frontend Web Developer that specializes in responsive-design, mobile-first websites with semantic HTML5, beautiful CSS3, and concise/documented JavaScript looking to join a team that loves designing and creating beautiful and engaging websites, with opportunities for growth and mentorship.
